**Rebate Information**

This measure is installation of a new (e.g., newly manufactured) turbine- or centrifugal-style irrigation pump to replace an existing pump. This measure applies to pumping operations that deliver, distribute or transport irrigation water. The pump must range from 20 to 500 horsepower. The existing pump being replaced must be centrifugal, turbine or submersible turbine. The new replacement pump must have the same or lower horsepower rating, unless it is coupled with a VFD. A change from a turbine pump to a centrifugal pump or centrifugal to a turbine is allowable. This measure may be used alone, or in combination with the retrofit measures Variable Frequency Drive for Centrifugal Agricultural Pumps or Variable Frequency Drive for Turbine Agricultural Pumps. If there is no nameplate, contact your Energy Efficiency engineer to help you convert utility kW readings to horsepower.

**Rebate amounts available per approved horsepower**

- New Agricultural Pump, \$50 per nameplate horsepower
