Home

The word “Home” as used in this document refers to the electrically heated living space within the residence. It does not include attached garages, unheated basements and porch areas or out buildings.

***Single Family**

Single Family includes buildings with four or fewer residences. Rebates are available at one or possibly more per residence. For example, homes that have two separately ducted heat pump systems qualify for 2 rebates when both systems are being replaced. Consult a Columbia REA Energy Specialist for multiple rebate approval.

****Multi-Family**

Multi-family includes buildings with more than four residences and three or fewer stories. Pre-approval by Columbia REA is required.

*****Customer Invoices** - must reflect the following:

- The customer name and address of install
- The total cost of each measure
- The total cost to the customer

******Rebate Application**

Weatherization measures on rebate application must detail pre- and post-insulation levels, existing windows types (when bidding window replacements) and square footages. This is needed to satisfy BPA’s energy audit requirement.
